

NOTICE TO ALL PARENTS, GUARDIANS, AND SCHOOL EMPLOYEES:

Pursuant to AHERA regulations (40 CFR Part 763) published by the Environmental Protection Agency on October 30, 1987, Polk School District has conducted asbestos inspections using Certified Asbestos Inspectors as required by the EPA's rules and regulations.

Small quantities of asbestos containing building materials have been found in some Polk County Schools. All asbestos containing building materials are routinely inspected as required by the EPA and pose no threat to either the environment or to building occupants. A management plan is on file at each school and at the Maintenance office.

Polk School District's asbestos coordinator is Jeff Little; phone 770-684-5975.
