Setting up a Parent Login for PowerSchool

In PowerSchool, parents have 24-hour access to their child’s grades in real time. Whether you have one child or multiple children in the system, a convenient option for you is to set up a parent login account to stay informed.

To get started, you need to obtain the unique username and password for your child from your child’s school. In most instances, school codes have already been distributed by letter to parents. If you have not received your child’s code, please contact the individual school to learn how to obtain the code.

Once you have the student code(s), log onto the Polk School District webpage at www.polk.k12.ga.us. Click the heading at the top of the page that says parents and click on PowerSchool login.
The PowerSchool login screen will then load. If you are creating your parent login account, click on the “Create Account” button at the bottom.
Now you will create your account by entering your first name, last name, email address, username you choose, a unique password you create (entered twice to prevent entry errors). In the second section, you will enter your child’s name, the child’s PowerSchool ID, the child’s password, and then use the drop down box to choose your relationship with the child. This screen allows entry of up to seven children.

Create your unique account here including the username and password you choose.

The parent portal allows monitoring of up to seven children in the program.

You should receive an email from PowerSchool confirming your account. If you experience problems, contact your school.
Here is an additional link that will show you how to navigate PowerSchool
